

Healkeren<sup>TM</sup>

## ALUMINIUM CRYSTALS

Dermabrasion Crystals are made of high purity (99.6%) white aluminum oxide. Dermabrasion crystals are used by professionals in microdermabrasion equipment, but can easily be added to creams and cleansers to create milder exfoliating products for home use. For this use, we offer a 120 size grit which feels like fine grains of sand when added to creams.

Microdermabrasion crystals can be useful in creating skin-sloughing formulations to safely eliminate dead cells located in the epidermis and enhance cell renewal at the superficial skin surface.
